

Licensing always seems to be complicated. That's why we try our best to make it as simple as possible and easy to understand. Here's what you can and cannot do with the resources provided under DiyPriceless Extended License. Part of what makes DiyPriceless bundles so valuable is the flexible licensing terms. We want to provide you with resources you can use in a variety of projects, while making sure intellectual property is respected. We also work hard to make sure our contributors get fairly compensated for their work.

All purchases from DiyPriceless include a single user license, allowing you to download/install the files onto multiple devices, granted that only a single user will access the files across all devices. You must purchase additional licenses for each person who will be using the files
